

## SPOKES FOR LITTLE FOLKS 2007

60 Kids will ride safely into the fall with brand new bikes!

This past Saturday, XI Technologies held its 3<sup>rd</sup> annual Spokes for Little Folks event. As a result of the training our clients attended this summer, another 60 children went home with their first shiny new bicycle, helmet, lock, bell and water bottle, and in every case, a huge smile.

XI believes strongly in supporting the Calgary community with tangible and meaningful donations. This event is our chance to provide some of Calgary's less fortunate children with a new bike and safety training. Recipients were selected by Calgary Family Services, Inner City Resource Center, Hull Child and Family Services and Big Brothers and Big Sisters of Calgary.

We are proud to hold this event every year, and are thankful for the support we receive from various organizations:

Calgary Paramedics Charity Society, SportChek, Chinook Centre Security and Bike Patrol Team, Just Kidding Entertainment, Spolumbo's, My Favorite Ice Cream Shoppe, Display Dynamics, Fresh Fitness, CAPL Golf Tournament, Laser Productions and The Famous Players Theatre Chinook, who donated use of the theatre for the children to view a free movie and enjoy popcorn and a drink.

XI Technologies specializes in enhanced energy information for the petroleum industry. Our client base accounts for over 80% of the production in the Western Canadian Sedimentary Basin. Our flagship products are: the H2S Search and the AssetBook. The H2S search is focused on EUB compliance and safety regulations and assists companies to prepare their drilling programs. The AssetBook helps companies identify potential acquisition, divestiture, merger, trade and farm-in opportunities.
