

Upgrades to XI's Surface Casing Report

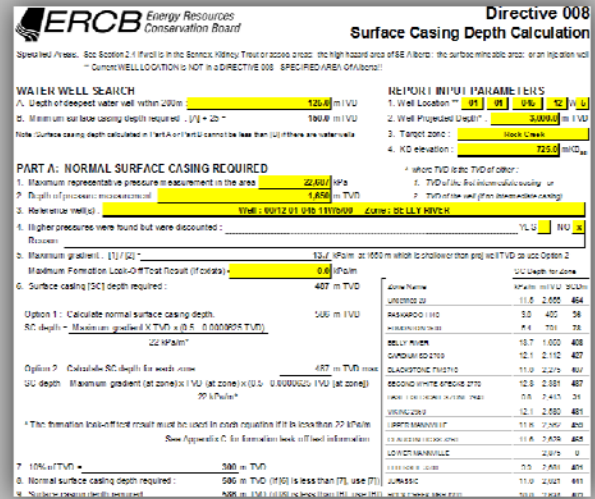

New Dashboard

To guide users through the various steps involved, we've built an easy-to-use interface for calculating your surface casing depth requirements.

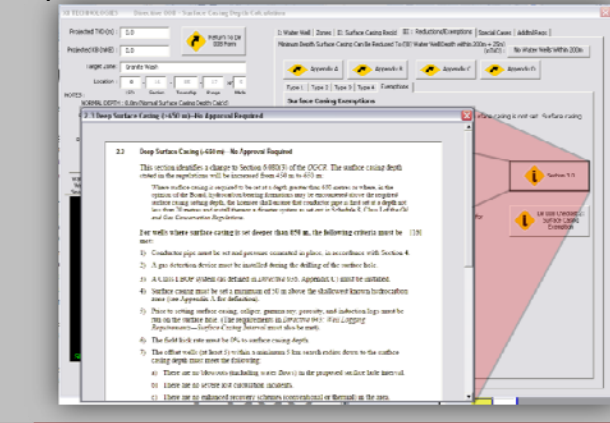

Compliance with new Directive 8

The Surface Casing Depth Calculation page (formerly the Surface Casing Check Sheet) was rebuilt to reflect the changes made to Directive 8.

Regulations at your fingertips

To ease users into the new rules, we've included links to all pertinent sections of Directive 008 as we guide you through the process of establishing your surface casing depth.

Release Notes Page

As with most other flagship XI products, Surface Casing will now have a Release Notes page. This is a forum to allow XI to communicate any major changes or upgrades you should know about, product related news, etc.
